Build Your Own IoT Weather Station

IEEE Northern VA Section Hands-On Workshop Series

October 29, 2016 Montgomery College

IEEE
Advancing Technology
for Humanity

Working From Home

›   Beware static electricity when handling chips

   – Modern chips are less senstivie than older ones

   – This classroom is humidity controlled and no carpet

   – But if you're on carpet with insulated shoes or the humidity is low (i.e. forced air heat)... handle with care

Conclusion

› We hope you found the class worthwhile

- Remember to take your kit but leave the Ethernet cables

- There are more things you can do with the hardware

- Share your enhancements! Send them to:

› For PDH Credits

- You must complete the course survey before you leave

- Everyone is encouraged to complete it
